The full Trellis screen map

A navigable design inventory, not production UI or finalized visual styling.

PUBLIC + ACCESS

- Landing / introduction
- Sign in + registration
- Connect / confirm Instagram
- Initial sync + error states

CORE APP

- Dashboard + analytics
- Profile audit + opportunities
- AI Chat + conversations
- Planner + content editor
- Review and publish

DISCOVERY

- Hot Topics / swiper
- Saved ideas + discussion
- Official IG / Edits updates
- Competitors + comparisons

ACCOUNT

- General / Instagram settings
- Creator voice + banned phrases
- Privacy + account lifecycle
- System states / edge cases

All screen families are shown. Nested features do not create extra top-level navigation tabs.

Landing page

A visitor should feel motivated within three seconds. The first action is clear.

Create Trellis account

Already have an account? Sign in

Trellis Privacy Terms Contact

Password and email verification policy is still a technical decision; the wireframe does not imply a provider.

Connect Instagram

The app is signed in, but needs user-authorized Instagram data before analytics.

T trellis

Account setup in progress

Sign out

Step 1 of 3 - Connect

Connect your Creator account

Trellis can analyze only the data you explicitly authorize.

What Trellis uses

- [ ] Profile + biography
- [ ] Posts, captions and media metadata
- [ ] Available insights and engagement measurements

Account authorization illustration

Continue with Instagram

Not now

Never show a blank Dashboard when an account is unconnected. Explain permissions and limitations.

Confirm Instagram identity

The user checks the exact account returned by Meta before linking it.

T trellis

Account setup in progress

Sign out

Step 2 of 3 - Confirm

Is this the correct account?

AUTHORIZED INSTAGRAM ACCOUNT

@account_from_meta

Creator account / permissions summary

Yes, connect this account

If the account is incorrect, return to authorization without saving this connection.

Choose another

Account name and media here are intentionally blank. Do not substitute a guessed identity.

Initial sync and connection status

Make import progress and unavailable data visible instead of guessing.

T trellis

Account setup in progress

Sign out

Step 3 of 3 - Sync

Preparing your workspace

We will import the data available under your authorized permissions.

Data availability checklist

Account details	Pending
Media + captions	Pending
Insights + history	May be limited

Open Dashboard

Retry sync

A verified account does not guarantee every metric. Sync failure needs Retry and a clear next step.

Dashboard - main view

Motivation comes from a clear next action, backed by actual account evidence.

T trellis

Dashboard | Hot Topics | Competitors

Chat | U

DASHBOARD OVERVIEW

Your next opportunity

Saved data appears first; refresh status and source timestamps are visible.

Refresh now

01 / OPPORTUNITIES

Your next actionable recommendation

Evidence and rationale appear here when data is available.

Explore suggestion

02 / PERFORMANCE

FOLLOWERS	REACH	VIEWS	ENGAGEMENT
-- No data in wireframe	-- No data in wireframe	-- No data in wireframe	-- No data in wireframe

03 / Profile audit

Bio + activity summary, with open details.

04 / Content Planner

Next planned post, drafts and calendar access.

Content Planner lives inside Dashboard. Chat is a global action, not a fourth primary section.

Dashboard - performance details

Drill down from headline KPIs into trends, comparisons and follower changes.

T trellis

Dashboard | Hot Topics | Competitors

Chat | U

DASHBOARD > ANALYTICS

Performance & history

Period selection; post comparisons; audience and follower analysis.

Last 30 days | Compare | Coverage info

Historic metric trend / chart

Metric freshness

Last observed / last checked / coverage.

Follower changes

Observable changes; no invented causes.

Top posts / period comparison

Rank by verified available measures.

Audience breakdown

Demographics where accessible.

Unknown metrics are unavailable, not zeros. Historical values must show their source and freshness.

Dashboard - profile audit

Explain the account, bio and recent content patterns behind recommendations.

T trellis | Dashboard | Hot Topics | Competitors | Chat | U

DASHBOARD > AUDIT

Profile audit & recommendations

Personalized improvements based on the creator profile and accessible history.

Your profile

Bio, niche, content style and activity observations.

Profile / bio snapshot

Recommended improvement

Specific opportunity; justification and uncertainty.

Evidence | Freshness

Content pattern observations

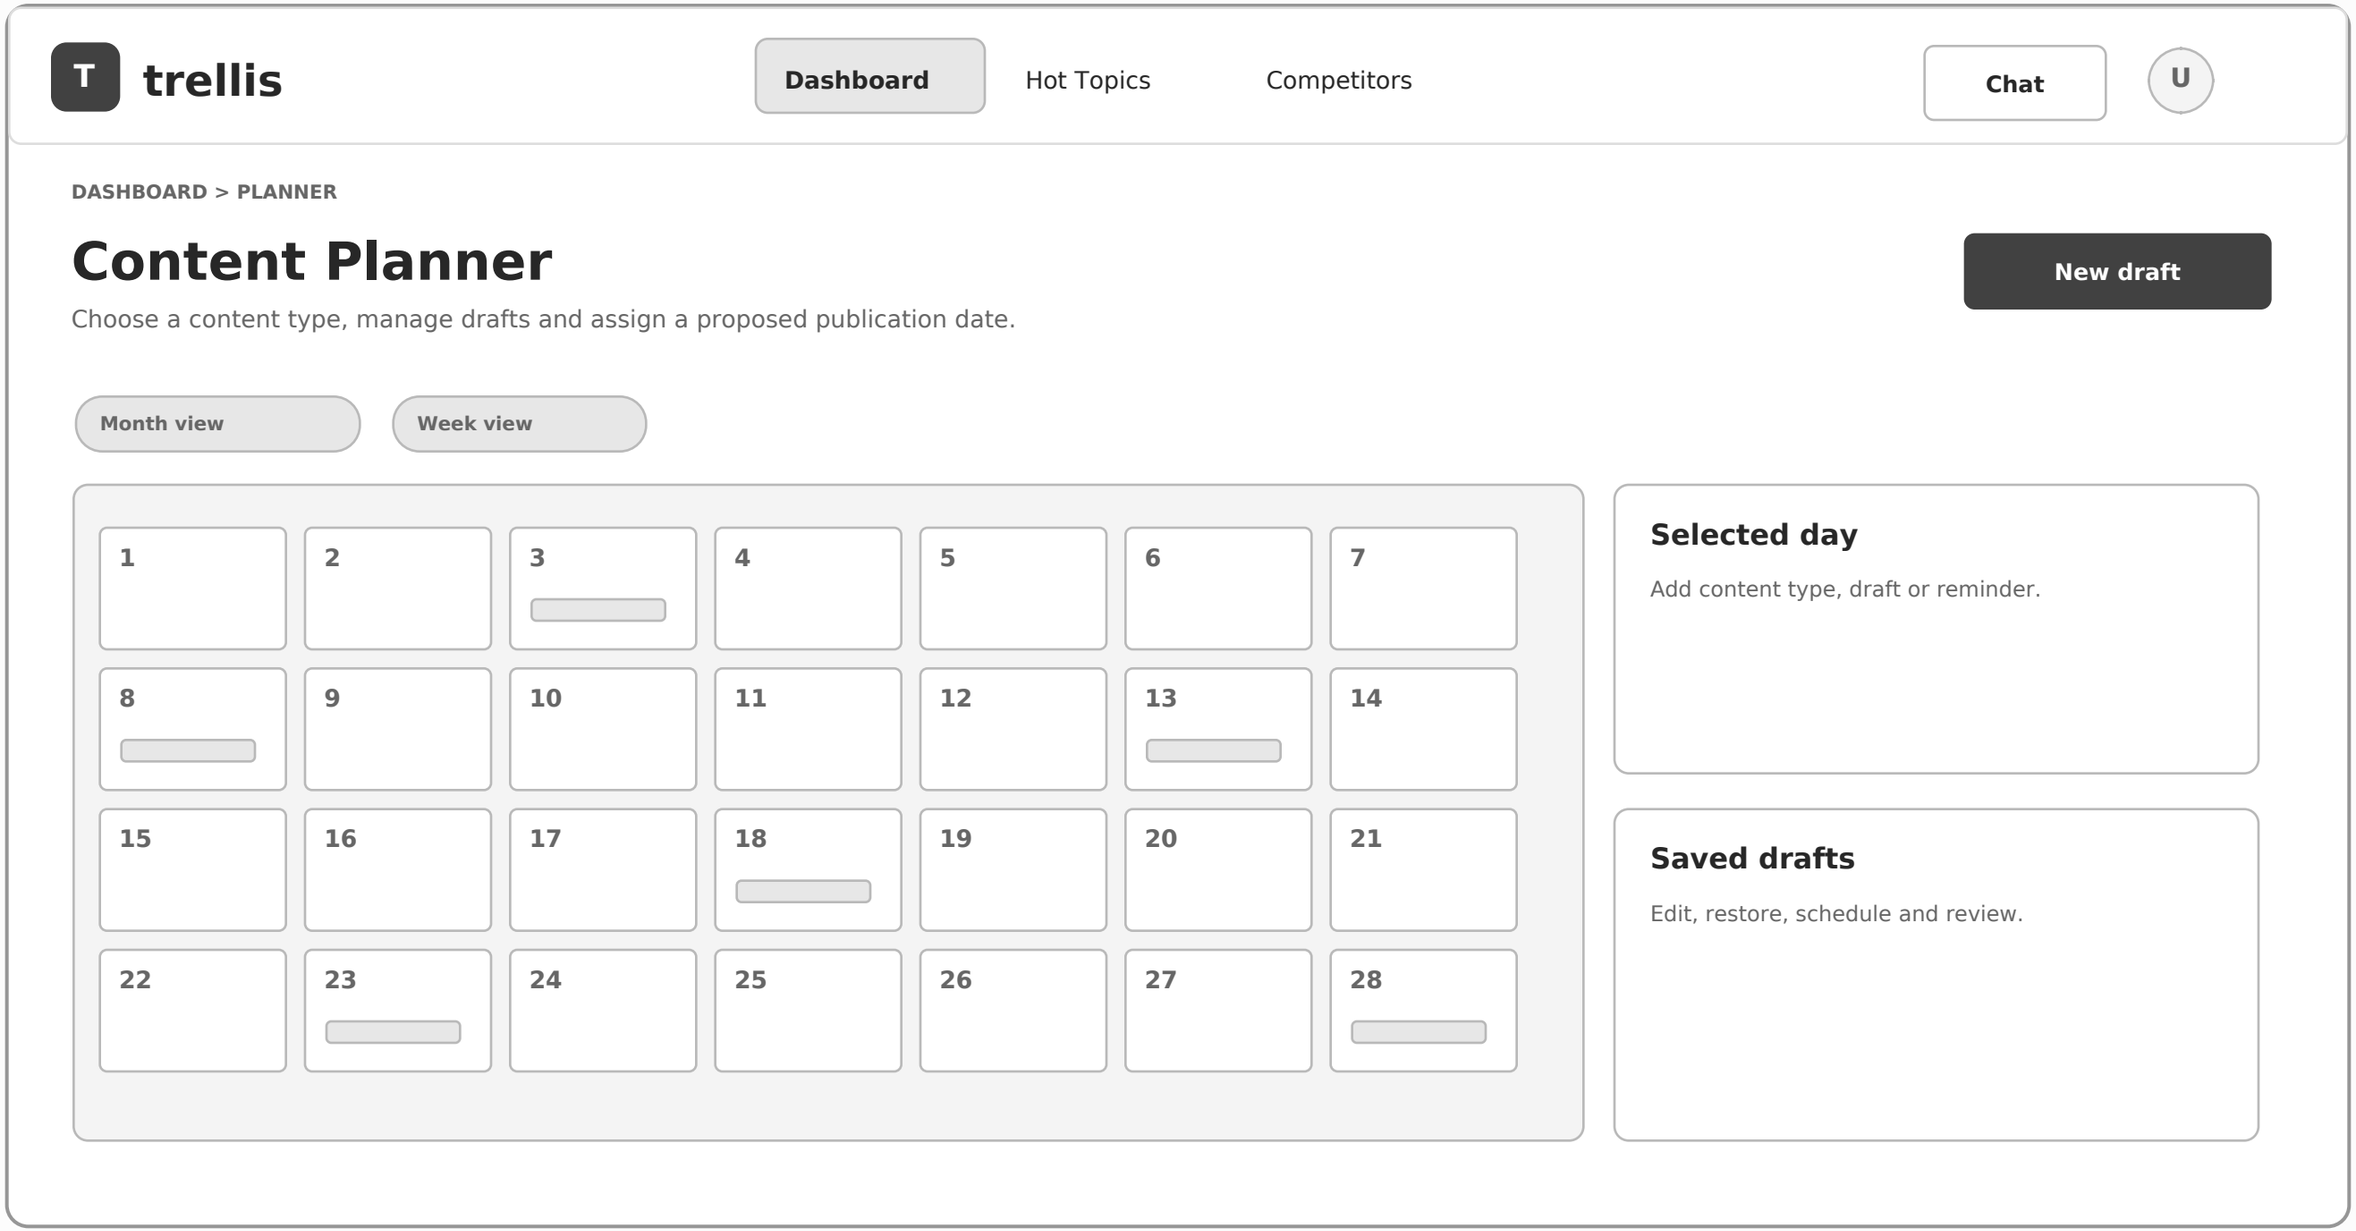

Notes on formats, recent posts, older relevant posts and creator voice.

Discuss with Chat

The suggestion must show evidence, limitations and a user-controlled next action.

Dashboard - Content Planner

Plan by day and format, access saved drafts, and see due or missed items.

Posting dates create reminders, not unattended publishing. Dates are illustrative calendar cells.

Content draft - editor

Image-guided, editable hook, caption, CTA and hashtags with persistent save state.

T trellis | Dashboard | Hot Topics | Competitors | Chat | U

DASHBOARD > PLANNER > DRAFT

Draft editor

Source images + editable generated content. Saving state is explicit.

Save draft

Suggested audience action

Hashtags

Editable hashtag list

Saving / Saved / Unsaved changes + prohibited language check

Do not invent user experiences. Show fill-in placeholders and active banned-phrase validation.

Publish - final review

Every publication requires explicit confirmation of the currently approved draft.

T trellis

Dashboard | Hot Topics | Competitors | Chat | U

DASHBOARD > PLANNER > REVIEW

Review before publishing

Inspect image, exact caption version and destination account.

Media preview

CURRENT APPROVED DRAFT

Hook / Caption / CTA / Hashtags

Final text preview / read-only version

Destination: @confirmed_account Draft version: current

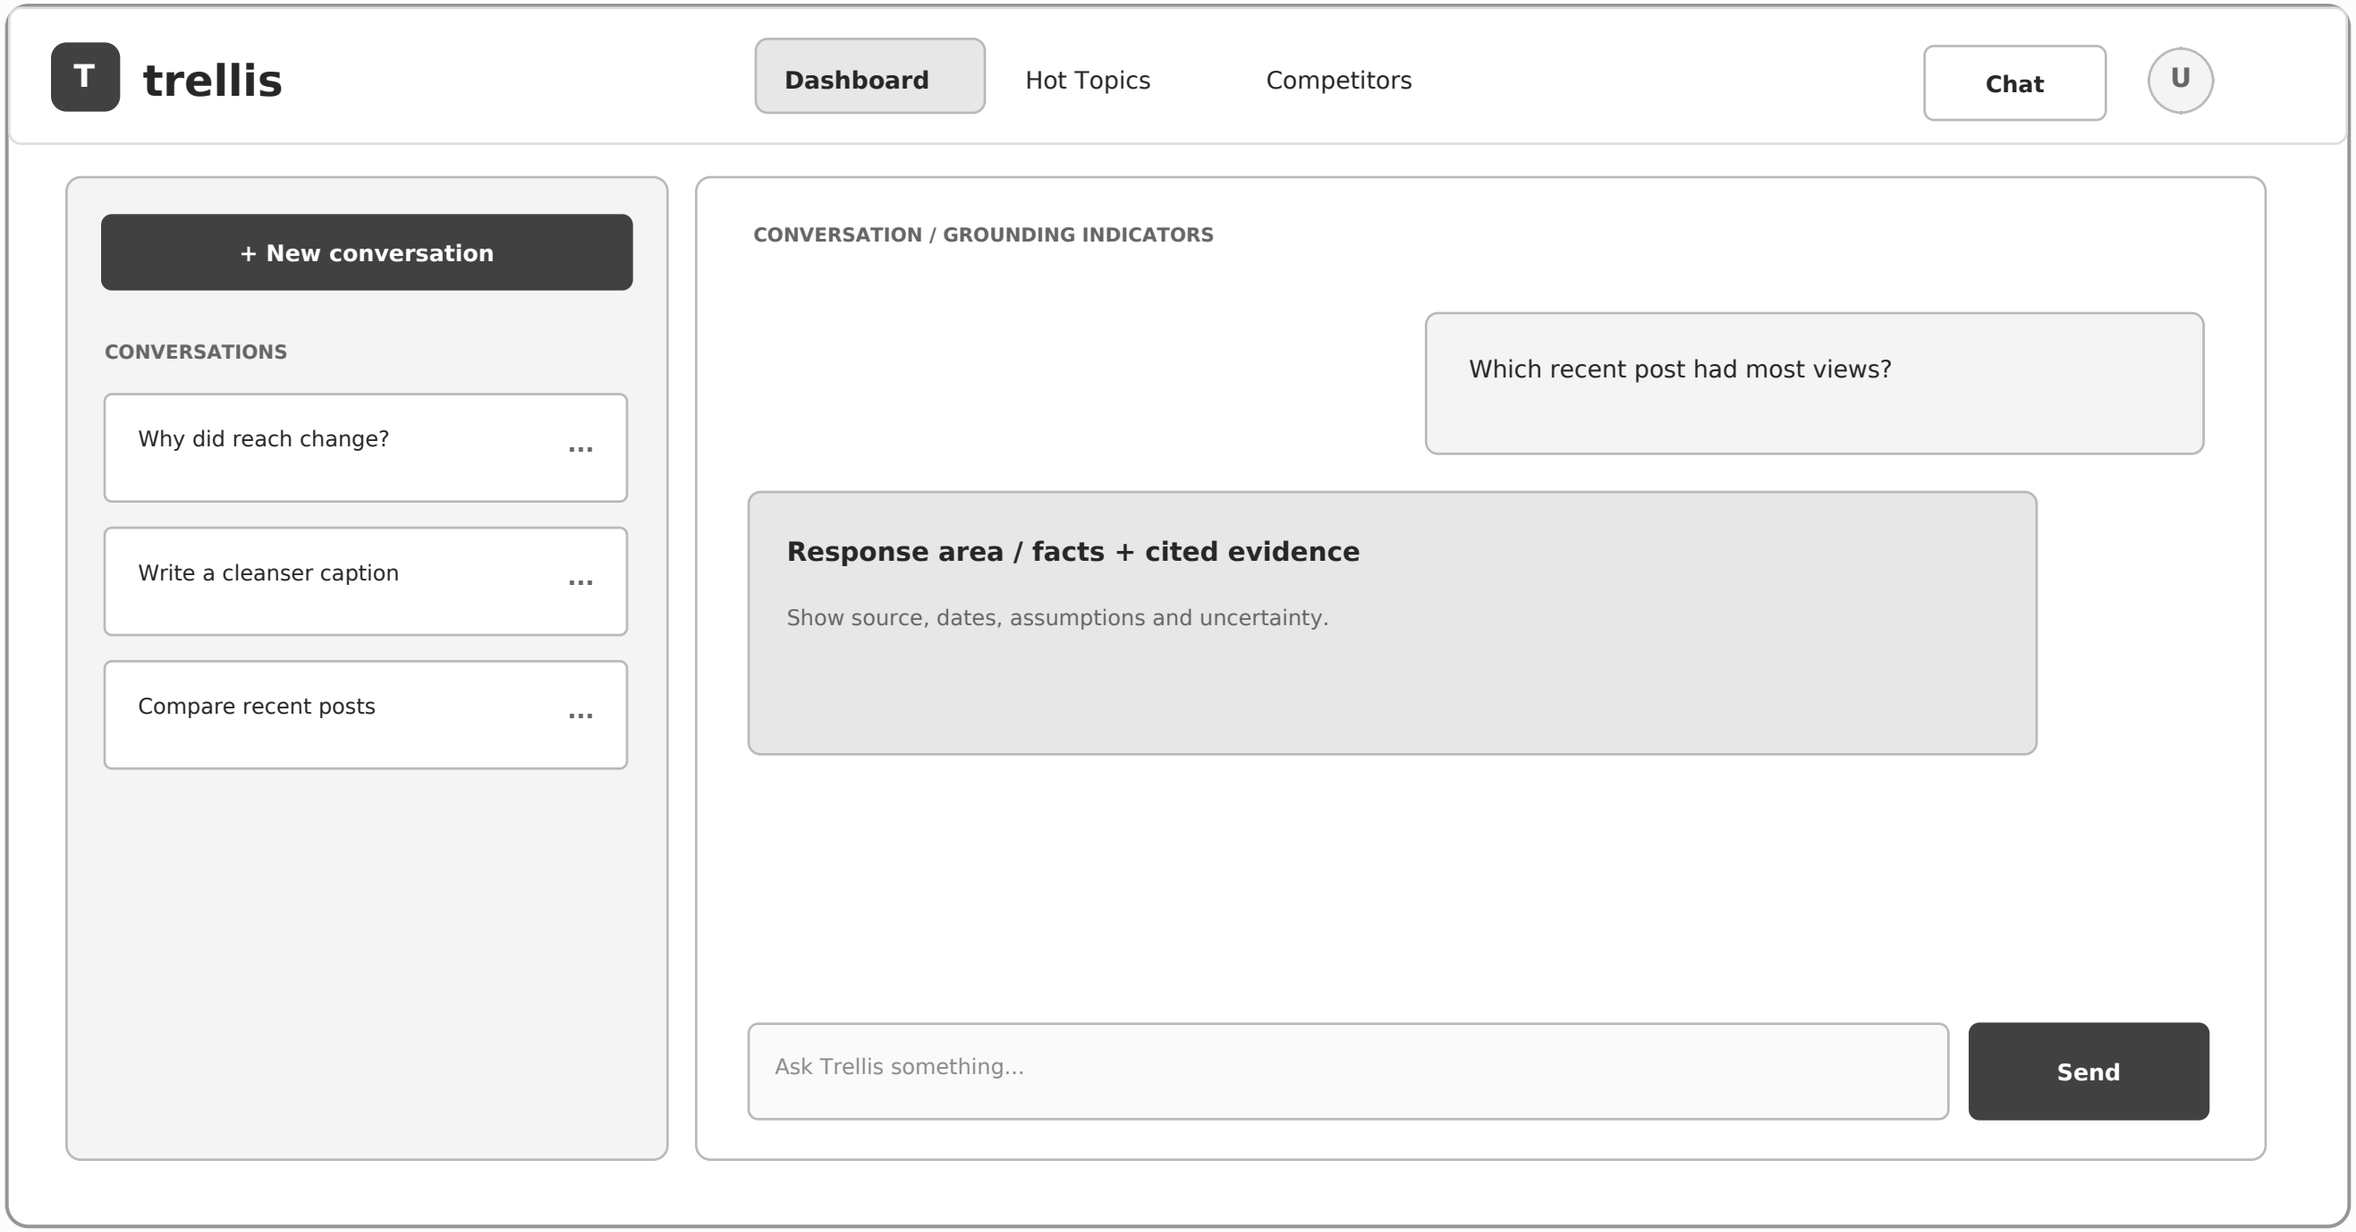

☐ I confirm I reviewed this exact content.

Back to editor Publish now

Failed or unknown publication result requires reconciliation; no invisible retry or scheduled autopublish.

AI Chat

A primary experience reachable from every main section of the application.

Chat deletion, context boundaries, grounded numbers, visible sources and provider errors all need UI states.

Hot Topics - discovery swiper

One combined Hot Topics, Niche Ideas and Swiper feature.

T trellis | Dashboard | **Hot Topics** | Competitors | **Chat** | U

HOT TOPICS > DISCOVER

Find your next idea

Swipe or use explicit buttons; discuss and plan the promising ideas.

Filters

Niche, format and recency.

IDEA 01 / GROUNDED SUGGESTION

Skincare content opportunity

Suggested format / media concept

Why this idea: attributable evidence and reasoning.

Freshness + uncertainty visible here.

Pass | **Save** | **Discuss AI** | **Plan**

Saved ideas

Open your saved decisions.

Every idea has rationale, source freshness and uncertainty. Save/Pass must work without gestures.

Hot Topics - saved ideas

Review saved suggestions and turn one into a draft or planner entry.

T trellis | Dashboard | Hot Topics | Competitors | Chat | U

HOT TOPICS > SAVED

Saved ideas

Previously saved suggestions with their evidence and planned status.

Saved skincare format idea

Source-backed observations / saved date

Discuss | Add to planner

Educational post suggestion

Proposed format + evidence availability

Discuss | Add to planner

Ingredient explainer

Freshness and uncertainty indicators

Discuss | Add to planner

Save/pass feedback informs preferences but is not treated as proof of likely performance.

Hot Topics - official updates

Official Instagram algorithm and Meta Edits updates with clear provenance.

T trellis | Dashboard | **Hot Topics** | Competitors | **Chat** | U

HOT TOPICS > UPDATES

Instagram & Edits updates

Official news separated from Trellis interpretation.

All | **Instagram** | **Edits**

OFFICIAL SOURCE / DATE / SOURCE LINK

Update headline and concise summary placeholder

Read source

OFFICIAL SOURCE / DATE / SOURCE LINK

Update headline and concise summary placeholder

Trellis interpretation labeled separately

Read source

Each item needs publisher, canonical URL, publication date, retrieval date and clear Trellis inference labels.

Competitors - search and qualification

Only competitors with all five latest posts related to skincare qualify.

T trellis

Dashboard | Hot Topics | **Competitors** | Chat | U

COMPETITORS > DISCOVER

Find relevant competitors

Search and verify latest published posts before comparison.

Search professional skincare accounts...

Search accounts

QUALIFICATION RESULT / ACCOUNT

@candidate_account

Unknown until verified

Five latest posts (publication date order)

Post 1 / niche label	Post 2 / niche label	Post 3 / niche label	Post 4 / niche label	Post 5 / niche label

Four of five fails. Inaccessible or ambiguous evidence yields Unknown, not a fabricated pass.

Competitors - comparison and insights

Compare the user and qualified competitor on equivalent accessible measures.

T trellis | Dashboard | Hot Topics | **Competitors** | **Chat** | U

COMPETITORS > COMPARE

Compare performance

Qualified candidate only; use equivalent measures and time windows.

Your account

Confirmed owner profile and relevant available measures.

Qualified competitor

Five of five latest posts skincare, with evidence.

COMPARABLE MEASURES

Reach: N/A	**Views: N/A**	**Public engagement**	**Content format**

Comparative insight

Grounded recommendations; identify uncertainty and non-comparable statistics.

Display unavailable metrics and mismatched observation periods explicitly; show per-post evidence.

Settings - general and Instagram

Account preferences and a safe, explicit Instagram disconnection flow.

T trellis

Dashboard | Hot Topics | Competitors | Chat | U

ACCOUNT > SETTINGS

Settings

Account controls are reached from the profile dropdown.

- General
- **Instagram**
- Content & AI
- Privacy & account

General preferences

Theme mode; basic Trellis account preferences.

Connected Instagram

Identity, connection health, refresh preference and explicit disconnect action.

Disconnect account

One linked Instagram account per Trellis user initially. Disconnect is not account deletion.

Settings - content and AI preferences

The creator controls their voice examples and prohibited language, not an autonomous agent.

T trellis | Dashboard | Hot Topics | Competitors | Chat | U

ACCOUNT > SETTINGS

Content & AI preferences

Creator voice, strict excluded expressions and transparent memory controls.

Writing style and voice

Examples from your own captions; preferred tone and style.

Prohibited-expression list

Add / edit / remove the active phrase list.

Manual control | Review edits

Conversation memory and personalization

View, correct and delete explicitly approved cross-chat memories. Ordinary chat context stays in its thread.

Manage memories

Cross-chat memory is explicitly requested; rejected phrases never silently become permanent bans.

Settings - privacy and account

Make retained data, consent, disconnect and account deletion understandable.

T trellis | Dashboard | Hot Topics | Competitors | Chat | U

ACCOUNT > SETTINGS

Privacy & account

Data control should explain consequences before destructive confirmation.

Stored data and retention

Chats, posts, insights, media, drafts and consent categories.

Instagram disconnect

Stop data retrieval; choose permitted retained categories or deletion.

Manage connection

Delete Trellis account

Separate protected confirmation, effects and error reporting.

Delete account

Account deletion and Instagram disconnection are distinct; require confirmation and honest completion feedback.

Critical screen states

States that apply to multiple screens and must be specified before implementation.

01 / No Instagram account

Show Connect call to action; avoid empty charts.

02 / No observations

Explain missing coverage and available alternatives.

03 / Provider or token error

Retry or reconnect; preserve saved data if valid.

04 / AI rate limit / outage

Useful progress and honest inability to answer.

05 / Draft autosave status

Saving, Saved, Unsaved, conflict and recovery.

06 / Publish status

Confirmation, in progress, failed or uncertain.

07 / In-app reminder

Dismissible toast; pending task remains.

08 / Access denied / deletion

Permission and destructive-action confirmation.

A full flow exists for each state family; every status must accurately reflect data and saved results.
